As per the provisions of the regulations governing CBCS every department has nominated one faculty member as mentor and CBCS coordinator. The responsibilities of the CBCS coordinator include both academic and stress related counseling to the students in their respective departments. Most problems related to choice of the courses, selection of open electives, dropping of courses/semester are decided by the students in consultation with the CBCS coordinator. Students discuss their difficulties and study related problems also with the coordinator. The issues that cannot be addressed by the coordinator would be referred to the chairperson of the department who takes an appropriate decision in consultation with department council. The mentoring system is periodically reviewed by the CBCS committee headed by the Chief Nodal Officer, CBCS.

7.1.2 – Environmental Consciousness and Sustainability/Alternate Energy initiatives such as:

| Percentage of power requirement of the University met by the renewable energy sources |
|---|
| The University of Mysore is one of the cleanest universities in the country. It has employed 120 cleaning operators to maintain the campus all through the year. The University campus is lush green in all monsoon seasons through natural rainfall and the same greenery is maintained during summer through a fullfledged garden department. The University has taken initiatives to convert all the street lamps into solarized lighting system through a unique network which is operable independently. This has reduced the payments of power consumption to the electricity department to the tune of 5. In addition to this, all the hostels have been provided with heavy duty solar water heaters which also in turn reduces the power consumption expenditure to another 5. Rainwater harvesting is a major initiative taken by the University after the previous accreditation. The Swatch Bharat Abhiyan is yet another initiative taken up by the students and teachers to maintain the campuses all through year. For this, the University has also collaborated with NGOs of Mysore city, Mysore City Corporation, and Alummi Associations. It is a recordable initiative that the University of Mysore has established composting units to handle bio waste, solid wastes, and kitchen wastes that are utilizable for making manures suitable for garden department. The University of Mysore maintains coconut farms, orchards, plant clinics, herbal gardens, botanical gardens, and lawns using these resources. Most of the class rooms, auditoriums, and laboratories are provided with powerbackup facilities through storage systems. The students and staff are provided with purified water supply for drinking and laboratory purposes. RO booths are kept for the benefit of all campus dwellers all through out the year. Recently, the University has launched ekart facility for the benefit of students and faculty. |

## 7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Drushti Centre for Education of Visually Challenged Throughout the world there has been a realization that persons, who are physically challenged required special attention for education and participation in social activities. The world has recognized the need to provide academic courses specially designed to help the students with visual disabilities like blindness, low vision and critical eye diseases. Universities need to provide an outstanding leadership to the cause of special education by facilitating significant opportunities and support to disadvantaged students of the society. Mere compassion to such

students will not solve the problems in the society and the institutes of higher learning need to become role models in bringing light of knowledge to the differently challenged students. Universities are citadels of higher learning. The goals of universities should encompass all categories of students with varying degrees of abilities and disabilities.In this regard, the University of Mysore has set up a centre exclusively for the visually challenged to enhance their skills and increase their employability in the market driven corporatized world. The university is committed to provide inclusive education and training to the students with special needs. Committee for the Development of Science in Schools (CDSS) Promoting Science at secondary school education, through the Committee for the Development of Science In Schools (CDSS) is a unique step by the University of Mysore. The committee has been constituted by the university during 2006 and has initiated many activities for making the school children develop interest in science. Indeed it is a very useful community outreach activity of the university. The expertise of the university is brought in to the schools and creates a wonderful platform for school children to interact. Many of the faculty members from science department have been helping the CDSS in this venture. CDSS also designed and established a Mobile Science Laboratory to the benefit of students of the High School coming under four districts namely Mysore, Mandya, Chamarajanagar and Hassan. The KSST, Govt. of Karnataka financially supported this program as well. The students were allowed to do a few experiments by themselves to get hands on experience in doing experiments. In addition to allowing students to perform experiment a Science interaction session is being organized with the help of resource persons drafted from science departments of University of Mysore. Several science programs were being organized to create awareness among school children on basic sciences, to dispel the myth that learning of science and mathematics is difficult. Further, CDSS also empower science teachers in school in learning and teaching science pedagogy. The main objective of the CDSS programme is • Promoting Science at Secondary Education • To create awareness among school children on basic sciences. • To dispel the myth that, learning of science is difficult. • Empowerment of school teachers. • Talent identification at school level.

## 8.Future Plans of Actions for Next Academic Year

To encourage and orient young faculty to carry out original research, the University will increase the number of award for Minor Research Projects from internal resources. Senior and external experts will give an orientation on preparing the research proposal and the significance of the minor research projects in their respective disciplines. Information on different funding agencies at the state, national and international levels will be brought to the

notice of young researchers. Research proposals from teachers of all the faculties on current socio-economic and scientific issues will be encouraged for funding minor research projects. Such research proposals will be evaluated by a panel of internal and external experts. Publishing the outcomes of these research works in Peer-reviewed journals by these researchers will be made mandatory. Young researchers will be financially supported to attend national and international conferences for their research presentations and knowledge transfer.
