UNIVERSITY OF MYSORE
GUIDELINES AND REGULATIONS
LEADING TO
PH. D. IN SUGAR TECHNOLOGY

Programme Details

Name of the Department	:	Department of Studies in Sugar Technology
Subject	:	Sugar Technology
Faculty	:	Science and Technology
Name of the Programme	:	Ph. D. in Sugar Technology

Program Outcome:

The student on pursuing research in Sugar Technology will be able to

- develop holistic and scientific thinking
- conduct original research in theoretical and industrial aspects of sugar manufacturing through innovate or invent approach.
- Acquire substantive knowledge in a specific area through independent study and critical thinking with a view to demonstrate mastery in the field
- enhance education through participation and interaction in seminars and conferences
- inculcate ethical laboratory practices, factual data interpretation and establishment of new research findings.

COURSE-I : ADVANCED RESEARCH METHODOLOGY

Course Outcome:

After the completion of this course the students will be able to

- develop a better analytical mind and inculcate perseverance.
- formulating ideas about the topic, discussing important issues, exchanging ideas with fellow researchers, and course teachers

Pedagogy

- Lecture, discussions, and seminars

COURSE CONTENT

UNIT-I : RESEARCH METHODOLOGY : AN INTRODUCTION

Definitions of Research Objectives of Research Motivation in research, Types of research, Research Approaches, significance of research, Research and Scientific Methods, research process, criteria for good research

UNIT-II : RESEARCH PROBLEM :

Defining research problem, selecting the problem, necessity of defining problem, technique involved in defining a problem, illustration, analysis of experimental data.

UNIT-III : RESEARCH DESIGN :

Meaning, need for research design, features of a good design, different research designs, basic principles of research design.

UNIT-IV : RESEARCH COMMUNICATION :

Allocable time to prepare report, essentials of a scientific report, categories of audience reports oral and written report, stages in preparing the research report, steps in drafting reports presentation of errors, presentation of inconclusive or negative reports.

UNIT-V : STRUCTURE OF RESEARCH REPORT :

Title page, abbreviations, abstract, introduction, materials and methods, statistical analysis results, tables and figures, discussions, conclusion, acknowledgement, references.

UNIT-VI : COMPUTER :

Basics of editing and word processing, plotting graphs and tables using MS Excel, power point presentation, error analysis (mean, median, standard deviation, variance, correlation coefficient) using statistical packages.

COURSE II- REVIEW OF LITERATURE

Course Outcome

After the completion of this course the students will be able

- consolidate a relevant Ph.D topic.
- find a relevant topic through exhaustive literature survey and in depth study
