University of Mysore

Mysore.

Date: 31-01-2020

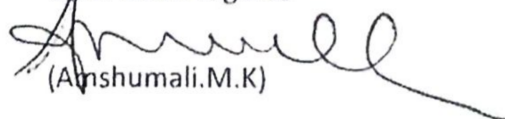

Dear Sir,

I am writing you to explore the possibility of the active collaboration for synthesis and crystallographic analysis. We are extensively working on the organometallic compounds. The crystal structure determination of these compounds are of paramount importance for publication of results. Since you have the crystallographic facility and expertise required in this area, I am here by requesting you to extend this facility to our group.

As a part of active collaboration you and your group member will be having the partnership in the publication of the results in journals and conferences.

Thanking you

With warm regards

(Amshumali.M.K)
