No.AC2(S)/54/2024-25

Dated: 15.07.2024

**Notification**

**Sub:-**Syllabus and Scheme of Examinations of Artificial Intelligence and Machine Learning programme (VII & VIII Semester) from the Academic year 2024- 25.

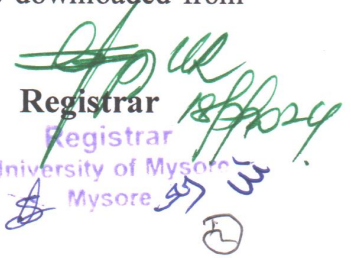

- Ref:-**1. Decision of Board of Studies in Artificial Intelligence and Machine Learning meeting held on 11-05-2024.  
2. Decision of the Faculty of School of Engineering meeting held on 14-06-2024.  
3. Decision of the Academic Council meeting held on 28-06-2024.

\*\*\*\*\*

The Board of Studies in Artificial Intelligence and Machine Learning which met on 11-05-2024 has resolved to recommend & approved the Syllabus and Scheme of examinations of Artificial Intelligence and Machine Learning programme (VII & VIII Semester) with effect from the Academic year 2024-25.

The Faculty of School of Engineering and Academic Council at their meetings held on 14-06-2024 and 28-06-2024 respectively has also approved the above said Syllabus and Scheme of examinations, hence it is hereby notified.

The Syllabus and Scheme of Examinations content may be downloaded from the University Website i.e., [www.uni-mysore.ac.in](http://www.uni-mysore.ac.in).

**Credit Definition:**

1-hour lecture(L) per week per semester = 1 Credit  
2-hour tutorial (T) per week per semester = 1 Credit  
2-hour Practical/Drawing (P) per week per semester = 1 Credit

Four-credit courses are to be designed for 50 hours of Teaching-Learning process.  
Three credit courses are to be designed for 40 hours of Teaching-Learning process.  
Two credit courses are to be designed for 25 hours of Teaching-Learning process.  
One credit course is to be designed for 15 hours of Teaching-Learning process

**Professional Elective Courses (PEC):** A professional elective (PEC) course is intended to enhance the depth and breadth of educational experience in the Engineering and Technology curriculum. Multidisciplinary courses that are added supplement the latest trend and advanced technology in the selected stream of engineering. Students can select any one of the professional electives offered by any department. **Selection of a professional elective is not allowed provided,**

- The candidate has studied the same course during the previous semesters of the programme.
- The syllabus content of open elective is similar to that of Departmental core courses, Open Electives or Professional electives.
- A similar course, under any category, is prescribed in the higher semesters of the programme.
- Registration to electives shall be documented under the guidance of Programme Coordinator/ Adviser/Mentor.

**Project work:** Based on the ability/abilities of the student/s and recommendations of the mentor, a single discipline or a multidisciplinary Mini project can be assigned to an individual student or to a group having not more than 4 students.

CIE procedure for Project:

(i) **Single discipline:** The CIE marks shall be awarded by a committee consisting of the Head of the concerned Department and two senior faculty members of the Department, one of whom shall be the Guide. The CIE marks awarded for the Mini-project work, shall be based on the evaluation of project report, project presentation skill and question and answer session in the ratio 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.

(ii) **Interdisciplinary:** Continuous Internal Evaluation shall be group wise at the college level with the participation of all the guides of the college. The CIE marks awarded for the Mini-project, shall be based on the evaluation of project report, project presentation skill and question and answer session in the ratio 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.

**AICTE Activity Points:** AICTE Activity Points to be earned by students admitted to BE/B.Tech., day college programme.

**In case students fail to earn the prescribed activity Points, an Eighth semester Grade Card shall be issued only after earning the required activity Points. Students shall be admitted for the award of the degree only after the release of the Eighth semester Grade Card.**

Note: AI&ML: Artificial Intelligence and Machine Learning, PROJECT: Project work phase-II and INT: Internship

#### Credit Definition:

1-hour lecture(L) per week per semester = 1 Credit

2-hour tutorial (T) per week per semester = 1 Credit

2-hour Practical/Drawing (P) per week per semester = 1 Credit

**Four-credit** courses are to be designed for 50 hours of Teaching-Learning process.

**Three credit** courses are to be designed for 40 hours of Teaching-Learning process.

**Two credit** courses are to be designed for 25 hours of Teaching-Learning process.

**One credit** course is to be designed for 15 hours of Teaching-Learning process

**Technical Seminar:** The objective of the seminar is to inculcate self-learning, present the seminar topic confidently, enhance communication skills, and involve participants in group discussions for the exchange of ideas. Each student, under the guidance of a faculty, shall choose, preferably, a recent topic of his or her interest relevant to the program of specialization.

- Carry out a literature survey and systematically organize the content.
- Prepare the report with your own sentences, avoiding a cut-and-paste act.
- Type the matter to become familiar with the use of Microsoft Excel, drawing tools, or any such facilities.
- Present the seminar topic orally and/or through PowerPoint slides.
- Answer the queries and involve yourself in debate or discussion.
- Submit a typed report with a list of references.

The participants shall take part in the discussion to foster a friendly and stimulating environment in which the students are motivated to reach high standards and become self-confident.

#### Evaluation Procedure:

The CIE marks for the seminar shall be awarded (based on the relevance of the topic, presentation skill, participation in the question and answer session, and quality of report) by the committee constituted for the purpose by the Head of the Department. The committee shall consist of three teachers from the department with the senior-most acting as the Chairman.

**Marks distribution for CIE of the course:**

**Seminar Report:**50 marks

**Presentation skill:**25 marks

**Question and Answer:** 25 marks.

**No SEE component for Technical Seminar.**

#### CIE procedure for Project Work:

- 1) **Single discipline:** The CIE marks shall be awarded by a committee consisting of the Head of the concerned Department and two seniors faculty members of the Department, one of whom shall be the Guide. The CIE marks awarded for the project work, shall be based on the evaluation of project work Report, project presentation skill, and question and answer session in the ratio 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.
- 2) **Interdisciplinary:** Continuous Internal Evaluation shall be group-wise at the college level with the participation of all guides of the college. Participation of external guide/s, if any, is desirable. The CIE marks awarded for the project work, shall be based on the evaluation of project work Report, project presentation skill, and question and answer session in the ratio 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.
- 3) **SEE procedure for Project Work:** SEE for project work will be conducted by the two examiners appointed by the University. The SEE marks awarded for the project work shall be based on the evaluation of project work Report, project presentation skill, and question and answer session in the ratio 50:25:25

**AICTE Activity Points:** AICTE Activity Points to be earned by students admitted to BE/B.Tech., day college programme

(For more details refer to Chapter 6, AICTE Activity Point Programme, Model Internship Guidelines)

- Over and above the academic grades, every Day College regular student admitted to the 4 years Degree programme and every student entering 4 years Degree programme through lateral entry, shall earn 100 and 75 Activity Points respectively for the award of degree through AICTE Activity Point Programme.
- Students transferred from other Universities to the fifth semester are required to earn 50 Activity Points from the year of entry to UoM. The Activity Points earned shall be reflected on the student's eighth semester Grade Card.
- The activities can be spread over the years, anytime during the semester weekends and holidays, as per the liking and convenience of the student from the year of entry to the programme. However, the minimum hours' requirement should be fulfilled.
- Activity Points (non-credit) do not affect SGPA/CGPA and shall not be considered for vertical progression.

In case students fail to earn the prescribed activity Points, an Eighth semester Grade Card shall be issued only after earning the required activity Points. Students shall be admitted for the award of the degree only after the release of the Eighth semester Grade Card.

ಗೆ:

ಕುಲಸಚಿವರು

ಮೈಸೂರು ವಿಶ್ವವಿದ್ಯಾನಿಲಯ  
ಮೈಸೂರು.

ಮಾನ್ಯರೆ,

ವಿಷಯ: BOS ಸಭೆಯನ್ನು ನಡೆಸಲು ಅನುಮತಿ ನೀಡುವ ಬಗ್ಗೆ.

ಮೇಲ್ಕಂಡ ವಿಷಯಕ್ಕೆ ಸಂಬಂಧಿಸಿದಂತೆ, 2024-25ನೇ ಶೈಕ್ಷಣಿಕ ಸಾಲಿನ ಬಿ.ಇ ಕೋರ್ಸಿನ  
Computer Science and Design, Artificial Intelligence & Machine Learning ಮತ್ತು  
Artificial Intelligence & Data Science ವಿಭಾಗಗಳ BOS ಸಭೆಯು ದಿನಾಂಕ  
11.05.2024ರಂದು ನಡೆಸಬೇಕಾಗಿ ನಿಗದಿಯಾಗಿರುತ್ತದೆ. ಆದರೆ Computer Science and Design  
ವಿಭಾಗದ BOS ಸಭೆಯ ಅಧ್ಯಕ್ಷರಾದ ಪ್ರೊ. ಸುರೇಶ್ ಎಸ್ ರವರು ಆಸ್ಪತ್ರೆಯಲ್ಲಿ ಚಿಕಿತ್ಸೆ  
ಪಡೆಯುತ್ತಿರುವ ಕಾರಣ ಸಭೆಗೆ ಹಾಜರಾಗಲು ಸಾಧ್ಯವಾಗುತ್ತಿಲ್ಲ. ಆದಕಾರಣ ಈ ಸಭೆಯಲ್ಲಿ ಅವರ  
ನಂತರದ ಸ್ಥಾನದಲ್ಲಿ ನಿರ್ದೇಶಕರ ಹೆಸರಿರುವುದರಿಂದ ಈ ಒಂದು ಸಭೆಗೆ ಸೀಮಿತವಾಗಿ ನಿರ್ದೇಶಕರ  
ಅಧ್ಯಕ್ಷತೆಯಲ್ಲಿ BOS ಸಭೆಯನ್ನು ನಡೆಸಲು ತಾವು ಅನುಮತಿಯನ್ನು ನೀಡಬೇಕೆಂದು ಈ ಮೂಲಕ  
ತಮ್ಮಲ್ಲಿ ಕೋರುತ್ತೇನೆ.

ವಂದನೆಗಳೊಡನೆ

 CHAIRPERSON  
 BOS IN AI & M. L  
 MUSE  
 MGM 06

**Course outcomes:**

At the end of the course the students will be able to:

- CO1: Understand the basic concepts of Neural Network.
- CO2: Apply the deep learning algorithms which are more appropriate for various types of learning tasks in various domains.
- CO3: Develop Generative models using Convolutional neural Network.
- CO4: Study on recent trends and applications of deep learning.
- CO5: Identify the model based from the model free methods. Identify stability/convergence and approximation properties of RL algorithms. Use deep learning methods to RL problems in practice.

## DEEP LEARNING LABORATORY

| PART   | Course Content   | Teaching Hours |
|--------|--|----------------|
| PART A | <ol style="list-style-type: none"> <li>Design a single unit perceptron for classification of a linearly separable binary dataset without using pre-defined models. Use the Perceptron() from sklearn.</li> <li>Identify the problem with single unit Perceptron. Classify using Or-, And- and Xor-ed data and analyze the result.</li> <li>Build an Artificial Neural Network by implementing the Backpropagation algorithm and test the same using appropriate data sets. Vary the activation functions used and compare the results.</li> </ol>  | 10 Hours       |
|        | <ol style="list-style-type: none"> <li>Build a Deep Feed Forward ANN by implementing the Backpropagation algorithm and test the same using appropriate data sets. Use the number of hidden layers <math>\geq 4</math>.</li> <li>Design and implement an Image classification model to classify a dataset of images using Deep Feed Forward NN. Record the accuracy corresponding to the number of epochs. Use the MNIST, CIFAR-10 datasets.</li> <li>Design and implement a CNN model (with 2 and with 4+ layers of convolutions) to classify multi category image datasets. Use the MNIST, Fashion MNIST, CIFAR-10 datasets. Set the No. of Epoch as 5, 10 and 20. Make the necessary changes whenever required. Record the accuracy corresponding to the number of epochs. Record the time required to run the program, using CPU as well as using GPU in Colab. and Test accuracy corresponding to the following architectures:               <ol style="list-style-type: none"> <li>Base Model</li> <li>Model with L1 Regularization</li> <li>Model with L2 Regularization</li> <li>Model with Dropout</li> <li>Model with both L2 (or L1) and Dropout.</li> </ol> </li> </ol> |                |
| PART B | <ol style="list-style-type: none"> <li>Use the concept of Data Augmentation to increase the data size from a single image.</li> <li>Design and implement a CNN model to classify CIFAR10 image dataset. Use the concept of Data Augmentation while designing the CNN model. Record the accuracy corresponding to the number of epochs.</li> <li>Implement the standard LeNet-5 CNN architecture model to classify multicategory image dataset (MNIST, Fashion MNIST) and check the accuracy.</li> <li>Implement the standard VGG-16 &amp; 19 CNN architecture model to classify multi category image dataset and check the accuracy.</li> <li>Implement RNN for sentiment analysis on movie reviews.</li> <li>Implement Bidirectional LSTM for sentiment analysis on movie reviews.</li> </ol>   | 10 Hours       |

**Laboratory Outcomes:**

The student should be able to illustrate the following operations:

- Understand and Implement Basic Deep Learning Models and Understand and Implement Backpropagation Algorithm.
- Explore Convolutional Neural Networks (CNNs) and Work with Advanced CNN Architectures
- Implement Deep Feed Forward Networks, explore Recurrent Neural Networks (RNNs) and LSTMs and Leverage GPUs for Training.

**Web References:**

|-----------------|--|------------------------------|
| <b>Module 1</b> | <b>Introduction:</b> Need for processing of natural languages, Language processing levels, Applications of NLP, Ambiguity and uncertainty in language, Regular Expressions, NLP tasks in syntax, semantics and pragmatics, Machine Translation.  | <b>08 Hours</b><br>L(4):T(4) |
| <b>Module 2</b> | <b>Morphological Processing:</b> Introduction to Corpus, Tokenization, Stemming, Lemmatization Inflectional and Derivational morphology, Morphological parsing, Finite state transducers, N- gram language models, practical illustrations with NLTK,<br><b>Python3:</b> Textual sources, APIs, social media and Web Scraping, practical illustrations with NLTK, Python3, Textual sources, APIs, social media and Web Scraping. | <b>08 Hours</b><br>L(4):T(4) |
| <b>Module 3</b> | <b>Information Retrieval:</b> Design features of Information Retrieval Systems, Classical, non-classical, Alternative Models of Information Retrieval, valuation Lexical Resources: World Net-Frame Net-Stemmers.<br><b>Part-of-Speech Tagging:</b> POS Tagger- Research Corpora.  | <b>08 Hours</b><br>L(4):T(4) |
| <b>Module 4</b> | <b>Large Language Models:</b> History and evolution of LLMs, Neural Network Architecture Building Blocks for LLMs, LLM models, Transformer Architecture, Training and Fine-tuning LLMs-Data collection, data Preprocessing, and fine-tuning strategies., Transformer variants: BERT, GPT Architecture, XLNet.  | <b>08 Hours</b><br>L(4):T(4) |
| <b>Module 5</b> | <b>Applications on Large Language Models:</b> Language translation, summarization, and paraphrasing. Exploring GPT-based applications- chatbots, content generation, and sentiment analysis, Advantages and Challenges of LLM, Ethical and Societal Implications   | <b>08 Hours</b><br>L(4):T(4) |

### Course outcomes:

At the end of the course the students will be able to:

- CO1: Understand the basic terminology and theory behind underlying natural language processing.  
 CO2: Understand approaches inflectional and derivational morphology and finite state transducers  
 CO3: Understand approaches to part of speech tagging, parsing syntax and semantics in NLP.  
 CO4: Understand basics of large language models and fine tuning LLM  
 CO5: Understand the applications of BERT, GPT.

|----------|--|-----------------------|
| Module 1 | <b>Introduction:</b> Basic Concepts, Retrieval Process Modelling Classic Information, Retrieval Set Theoretic, Algebraic and Probabilistic Models.   | 08 Hours<br>L(4):T(4) |
| Module 2 | <b>Retrieval Techniques:</b> Structured Text Retrieval Models, Retrieval Evaluation, Word Sense Disambiguation.  | 08 Hours<br>L(4):T(4) |
| Module 3 | <b>Querying: Languages:</b> Key Word-based Querying, Pattern Matching, Structural Queries, Query Operations, User Relevance Feedback, Local and Global Analysis  | 08 Hours<br>L(4):T(4) |
| Module 4 | <b>Text Operations:</b> Document Pre-processing, Clustering, Text Compression, Indexing and Searching, Inverted files, Boolean Queries, Sequential searching, Pattern matching.  | 08 Hours<br>L(4):T(4) |
| Module 5 | <b>User Interface &amp; Applications:</b> User Interface and Visualization, Human Computer Interaction, Access Process, Starting Points, Query Specification, Context User relevance Judgment, Interface for Search.<br><b>Searching the Web Challenges:</b> Characterizing the Web, Search Engines, Browsing, Meta searchers, Online IR systems, Online Public Access Catalogs. | 08 Hours<br>L(4):T(4) |

#### Course outcomes:

At the end of the course the student will be able to:

- CO1: Apply information retrieval principles to locate relevant information in large collections of data and Implement features of retrieval systems for web-based search tasks.
- CO2: Apply the common algorithms and techniques for information retrieval related to document indexing and query processing
- CO3: Demonstrate a thorough understanding and solid knowledge of the principles and techniques of human-computer interaction
- CO4: Implement graphical user interfaces with modern software tools and develop and design interactive software systems applications for real time applications
- CO5: Design and develop web applications for the effective informational retrieval

## Professional Elective -III/IV (21AI737)

| VII Semester               |       |            |    |
|----------------------------|-------|------------|----|
| PREDICTIVE ANALYTICS       |       |            |    |
| No. of Teaching hour/Week  | 2     | CIE Marks  | 50 |
| No. of Tutorial hours/week | 2     | SEE Marks  | 50 |
| Total No. of Lecture hours | 40    | Exam Hours | 03 |
| L: T: P                    | 2:2:0 | Credits    | 03 |

| Modules  | Course Content   | Teaching Hours        |
|----------|--|-----------------------|
| Module 1 | <b>Introduction to Predictive analytics:</b> Business analytics: types, applications, Analytical Techniques, Tools.  | 08 Hours<br>L(4):T(4) |
| Module 2 | <b>Predictive Modelling:</b> Propensity Models, Cluster Models, Applications.  | 08 Hours<br>L(4):T(4) |
| Module 3 | <b>Modelling Techniques:</b> Statistical Modelling, Machine Learning, Empirical Bayes Method, Point Estimation.  | 08 Hours<br>L(4):T(4) |
| Module 4 | <b>Data Pre-processing:</b> Data Transformations for Individual Predictors, Data Transformation for Multiple Predictors, Dealing with Missing Values, Removing Predictors, Adding Predictors, Binning Predictors. Over-Fitting and Model Tuning. | 08 Hours<br>L(4):T(4) |
| Module 5 | <b>Regression Models:</b> Measuring Performance in Regression Models, Linear Regression and Its Cousins, Non-Linear Regression Models, Regression Trees and Rule-Based Models.<br><b>Case Study:</b> Compressive Strength of Concrete Mixtures.  | 08 Hours<br>L(4):T(4) |

**Course outcomes:**

At the end of the course the student will be able to:

- CO1: Understand the importance of predictive analytics, able to prepare and process data for the models.
- CO2: Apply the statistical techniques for predictive models.
- CO3: Comprehend the transformation of data in the predictors.
- CO4: Apply regression and classification models for decision making and evaluate the performance.
- CO5: Apply and build the time series forecasting models in a variety of business contexts.

| L: T: P                    | 2:2:0 | Credits    | 03 |

| Modules  | Course Content   | Teaching Hours        |
|----------|--|-----------------------|
| Module 1 | <b>Introduction to Soft computing:</b> Neural networks, Symbolic Data, Genetic algorithms, Hybrid systems and its applications.<br>(ANN, FS, GA, SI, ES, Comparing among intelligent systems)<br><b>BNN:</b> introduction, biological inspiration, BNN & ANN, classification, first Generation NN, perceptron, illustrative problems (2nd generation), introduction, BPN, KNN, HNN, BAM, RBF, SVM and illustrative problems. | 08 Hours<br>L(4):T(4) |
| Module 2 | <b>Symbolic Data:</b> Symbolic and Classical Data, Categories, Concepts, and Symbolic Objects, Basic Descriptive Statistics: One Variate, Descriptive Statistics: Two or More Variates, Principal Component Analysis, Regression Analysis,<br><b>Cluster Analysis:</b> Dissimilarity and Distance Measures, Clustering Structures, Partitions, Hierarchy–Divisive Clustering, Hierarchy–Divisive Clustering.                 | 08 Hours<br>L(4):T(4) |
| Module 3 | <b>Genetic algorithms:</b> Introduction, Basic operations, Traditional algorithms, Simple GA General genetic algorithms, Operators, Stopping conditions for GA flow.   | 08 Hours<br>L(4):T(4) |
| Module 4 | <b>Swarm Intelligence System:</b> Introduction, background of SI, Ant colony system Working of ant colony optimization, ant colony for TSP. Unit commitment problem, Particle Swarm Intelligence system, Artificial bee colony system, Cuckoo search system.   | 08 Hours<br>L(4):T(4) |
| Module 5 | <b>Hybrid Systems:</b> Sequential Hybrid Systems, Auxiliary Hybrid Systems, Embedded Hybrid Systems, Neuro-Fuzzy Hybrid Systems, Neuro-Genetic Hybrid Systems, Fuzzy-Genetic Hybrid Systems.   | 08 Hours<br>L(4):T(4) |

**Course outcomes:**

At the end of the course the student will be able to:

- CO1: Implement machine learning through neural networks.  
 CO2: Design Genetic Algorithm to solve the optimization problem.  
 CO3: Develop a Fuzzy expert system.  
 CO4: Model Neuro Fuzzy system for clustering and classification.  
 CO5: Understand soft computing techniques Apply the learned techniques to solve realistic problems  
 Differentiate soft computing with hard computing techniques

### Ability Enhancement Course-III (21AEC751)

| VII Semester                          |       |            |    |
|---------------------------------------|-------|------------|----|
| DIGITAL IMAGE PROCESSING APPLICATIONS |       |            |    |
| No. of Teaching hour/Week             | 0     | CIE Marks  | 50 |
| No. of Practical hours/week           | 2     | SEE Marks  |    |
| Total No. of Lecture hours            | 20    | Exam Hours | 03 |
| L: T: P                               | 0:0:2 | Credits    | 01 |

| PART          | Course Content   | Teaching Hours  |
|---------------|--|-----------------|
| <b>PART A</b> | 1. Write a Program to read a digital image. Split and display image into 4 quadrants, up, down, right and left.<br>2. Write a program to show rotation, scaling, and translation of an image.<br>3. Read an image, first apply erosion to the image and then subtract the result from the original. Demonstrate the difference in the edge image if you use dilation instead of erosion. | <b>10 Hours</b> |
| <b>PART B</b> | 4. Read an image and extract and display low-level features such as edges, textures using filtering techniques.<br>5. Demonstrate enhancing and segmenting low contrast 2D images  | <b>10 Hours</b> |

**Mini Project List:**

- Student should develop a mini project, some of the projects are listed and it is not limited to:

**Similar to but not limited to:**

- ✓ Recognition of License Plate through Image Processing.
- ✓ Recognition of Face Emotion in Real-Time.
- ✓ Detection of Drowsy Driver in Real-Time.
- ✓ Recognition of Handwriting by Image Processing.
- ✓ Detection of Kidney Stone.
- ✓ Verification of Signature.
- ✓ Compression of Colour Image.
- ✓ Classification of Image Category.
- ✓ Detection of Skin Cancer.
- ✓ Marking System of Attendance using Image Processing.
- ✓ Detection of Liver Tumour.
- ✓ IRIS Segmentation.
- ✓ Detection of Skin Disease and / or Plant Disease.
- ✓ Biometric Sensing System.
- ✓ Mobile Phone Camera-based Light Communications.
- ✓ Modelling of Perspective Distortion within Face Images & Library for Object Tracking.
- ✓ Controlling of Intelligent Traffic Light & Image Processing.
- ✓ Controlling of Pests in Agriculture Field with Image Processing.

  
 CHAIRPERSON  
 BOS IN AI & M.I.T.  
 MUSE  
 MGM 08

**Laboratory Outcomes:**

The student should be able to illustrate the following operations:

- Image Segmentation algorithm development.
- Image filtering in spatial and frequency domain.
- Morphological operations in analyzing image structures.

**Course Learning Objectives:**

This course will enable students to:

**CO1:** Demonstrate the basic skills of image process.

**CO2:** Demonstrate the application development skills.

**CO3:** Design and develop the applications of images.

**Descriptions (if any):**

1. Programming tools preferred: MATLAB, SCILAB, Python, Java or any other relevant platform.
2. For Part A: Students must exhibit the results and its print copy to be attached to Lab record.
3. For Part B: Real Time Images can be used to demonstrate the work.

Installation procedure of the required software must be demonstrated, carried out in groups and documented in the journal.

 CHAIRPERSON  
 BOS IN AI & M.L  
 MUSE  
 MGM 06

**Laboratory Outcomes:** To provide practical experience in implementing and working with generative models. The student should be able to illustrate the following operations:

- Focus on the key learning objectives within the time constraints.
- datasets should be pre-processed if necessary to allow students to focus on the generative modeling aspects.
- Evaluate the performance of generative models in various applications.

**Course Learning Objectives:**

This course will enable students to:

**CO1:** Implementing various neural network architectures for image compression, reconstruction, and generation.

**CO2:** Designing and training advanced generative models for high-quality images.

**CO3:** Developing and applying neural network techniques for diverse applications.

**CO4:** Utilizing deep learning models for creative tasks like neural style transfer and text-to-image generation.

**CO5:** Understanding and applying soft computing techniques for solving real-time problems.

**Descriptions (if any):**

**Software Requirements:** Python programming environment with libraries such as TensorFlow, Keras, PyTorch, NumPy, Matplotlib, and Jupyter Notebooks

**Laboratory Outcomes:**

The student should be able to illustrate the following operations:

- The principles and practices of project management with a focus on using GitHub as a platform for collaboration, version control, and project tracking
- manage software development projects effectively using GitHub's tools and features.
- Basic understanding of software development and version control concepts.

**Course Learning Objectives:**

This course will enable students to:

**CO1:** Understand the basics of version control and the Git workflow

**CO2:** Utilize GitHub for project collaboration and source code management

**CO3:** Implement issue tracking and project management features in GitHub

**CO4:** Apply best practices for maintaining and contributing to open-source projects on GitHub

**CO5:** Integrate external tools and services with GitHub for continuous integration and deployment.

Develop a LaTeX script to create a simple report and article by using suitable commands and formats of user choice.</p> |  |
|  |   |  |

**Course outcomes:**

At the end of the course the students will be able to:

**CO1:** Understand the fundamental concepts of technical writing and LaTeX.

**CO2:** Create and format professional documents using LaTeX.

**CO3:** Incorporate graphics, tables, and mathematical equations into LaTeX documents.

**CO4:** Manage bibliographies and citations with BibTeX.

**CO5:** Develop a comprehensive understanding of advanced LaTeX features for professional document preparation.
