No.AC.2(S)/384/14-15

01-6

**NOTIFICATION**

Sub: Modification to the Regulations, Structure and Syllabus of M.Sc.  
(Audiology) Programme from the Academic Year 2016-17.

Ref: 1. Decision of the Faculty of Science & Technology Meeting held on  
16.02.2016.

2. Decision of the Academic Council meeting held on 29-03-2016.

\*\*\*\*\*

The Board of Studies in Speech- Language Pathology (PG) which met on  
24-11-2015 has resolved to modify the Regulations, Structure and Syllabus of M.Sc.  
(Speech Language Pathology) Programme from the academic year 2016-17.

The Faculty of Science and Technology and the Academic Council at their  
Meetings held on 16.02.2016 and 29.03.2016 respectively have also approved the  
above said proposal and the same is hereby notified.

The Modified Regulations, Structure and Syllabus of M.Sc. (Audiology)  
Programme is annexed and it may be downloaded from the University website i.e.,  
[www.uni-mysore.ac.in](http://www.uni-mysore.ac.in)

Draft approved by the Registrar

	<b>Course:</b> Hard Core <b>Credits:</b> 03 (L:T:P = 2:1:0) <b>Contact Hours:</b> 2L + 2T / week <b>Marks:</b> (25 + 25 + 50) 100	<b>Course:</b> Hard Core <b>Credits:</b> 03 (L:T:P = 2:1:0) <b>Contact Hours:</b> 2L + 2T / week <b>Marks:</b> (25 + 25 + 50) 100
	<b>Objectives</b>  1. <i>To familiarize the students with the effect of cochlear hearing loss on various psycho-acoustical tasks.</i> 2. <i>To familiarize the students with various procedures employed for these studies.</i>	<b>Objectives</b>  After studying this course student will be familiarized: 1. With various psycho-acoustical procedures used for assessing the functions of auditory system, 2. With the effects of sensori neural hearing loss of varying degrees and configuration on different psycho-acoustic tasks. 3. With outcomes and implications of these psycho-acoustic tasks. 4. With analyses and interpretation of results from psychophysical experiments

<b>88005 Technology for Speech-Language &amp; Hearing</b>	<b>Technology for Speech-Language &amp; Hearing</b>
<b>Course:</b> Soft Core <b>Credits:</b> 02 (L:T:P = 1:1:0) <b>Contact Hours:</b> 1L + 2T / week <b>Marks:</b> (25 + 25 + 50) 100	<b>Course:</b> Soft Core <b>Credits:</b> 03 (L:T:P = 2:1:0) <b>Contact Hours:</b> 2L + 2T / week <b>Marks:</b> (25 + 25 + 50) 100
<b>Objectives</b> 1. To give an overview of the latest technology involved in speech Acoustics, Signal processing, Instrumentation etc. 2. To provide fundamental concepts of the technology used in the instruments for diagnostics and therapeutics in Speech Language Sciences and Pathology 3. <b>To learn the various signal processing strategies used in hearing aid amplification, noise reduction, channel based gain and output control.</b> 4. To understand and observe the principle of working and functioning of equipments used for measurement of sounds and calibration of diagnostic equipments. 5. To learn practically the procedure for calibration of audiometers, middle ear analyzer, Otoacoustic emission analyzer, BERA etc.	<b>Objectives</b> <b>After successful completion of the course student should be able to:</b> 1. Give an overview of the latest technology involved in speech acoustics, signal processing and instrumentation. 2. Provide fundamental concepts of the technology used in the instruments for diagnostics and therapeutics in <b>Audiology</b> , Speech Language Sciences and Pathology 3. <b>Understand the basic technology used in hearing aids &amp; cochlear implants.</b> 4. Understand the principle of working and utility of equipment used for measurement of sound and calibration of diagnostic equipment. 5. Perform calibration of diagnostic

<p>6. To lay the foundation of ICT (Information and Communication Technology) concepts and illustrate the applications of ICT in Speech &amp; Language Pathology</p> <p>7. To demonstrate practically the concepts in basic principle of operation of transducers, amplifiers, display units and other signal processing and signal acquisition elements of bio medical instrumentation in speech and hearing.</p>	<p>instruments.</p> <p>6. Lay the foundation of Information and Communication Technology (ICT) concepts and illustrate its applications in <i>Audiology</i>, Speech &amp; Language Sciences &amp; Pathology.</p>

<b>Clinical Neuro-Psychology</b>	
<b>Course:</b> Soft Core <b>Credits:</b> 02 (L:T:P = 1:1:0) <b>Contact Hours:</b> 1L + 2T / week <b>Marks:</b> (25 + 25 + 50) 100	
<b>Objectives</b> <ul style="list-style-type: none"> <li>• To prepare students in the specific area of neuropsychology as a discipline seeking to understand brain-behavior relationships in the context of disorders in human communication.</li> <li>• To train students into skills and competencies required for incorporating the dimension of clinical neuropsychology in their practice for identification and management of communication disorders</li> <li>• To sensitize pupils on the ethical aspects of neuropsychological assessment and rehabilitation when dealing with communication disorders in special populations of individuals like children with special needs, brain-injured adults and the elderly.</li> <li>• To develop acumen for integrating neuropsychological perspective in the field of research in communication disorders.</li> </ul>	
<b>Unit 1</b> <ul style="list-style-type: none"> <li>• Clinical Neuropsychology: Meaning, Definition, History, &amp; Applications to Contemporary trends in understanding brain behavior relationships – Methods of Study: Ablation Studies – Split Brain -</li> <li>• Basics of Neuroanatomy and Neurophysiology: Nervous System - Structure and Functions – Divisions of Cortical Sub-Cortical Regions</li> <li>• Neural Connectivity, Conduction and Synaptic Transmission - Localization and Lateralization of Brain Functions: Lobe &amp; Hemispheric Functions -Plasticity of Functions</li> <li>• Overview of Organic Brain Syndromes: Dementias, Organic Psychoses, Convulsion Disorders &amp; Degenerative</li> </ul>	

Conditions	
<p><b>Unit 2</b></p> <ul style="list-style-type: none"> <li>• Clinical Neuropsychological Assessment: Meaning and Approaches – Fixed and Flexible Battery Approaches – Need and Purpose of Assessment – Changing Scenario of Clinometry: Issues and Problems</li> <li>• Ethical Issues in Assessment of Children and Elderly</li> <li>• Test Battery Approaches: LNNB and HRNTB – Adult and Child Versions; Geriatric Neuro-psychology:</li> <li>• Indian Scales: AIIMS Neuropsychological Test Battery, NIMHANS Neuro-psychological Test Battery and Functional Neuro-psychological Assessment Battery – Structure and Observation of Clinical Testing</li> </ul>	
<p><b>Unit 3</b></p> <ul style="list-style-type: none"> <li>• Clinical Neuro-psychological Assessment &amp; Profiling of Adults and Children: RINTB - Case Study – Progress and Problems in Child Neuropsychology</li> <li>• Assessment of Cognition – Tests of Attention/Concentration; Memory, Thinking and Intelligence - Clinical Mental Status Examination of Neuropsychological Functions</li> <li>• Contemporary Brain Imaging Techniques &amp; Electrophysiological Methods: EMG – GSR - fMRI - CT - EEG - MEG - CBF - PET - Ablation Studies - Split Brain Research - Dichotic Listening – Clinical Case Studies - Lesion Studies; Functional Behavioral Profiling</li> </ul>	
<p><b>Unit 4</b></p> <ul style="list-style-type: none"> <li>• Neuro-rehabilitation: Meaning, Purpose and Theories - Plasticity of Brain Functions; Functional Adaptation; and Artifact Theories - Meaning, Approaches and Techniques: Remediation, Compensation and Adaptive – Measuring Efficacy and Outcomes</li> <li>• Attention and Memory Retraining Programs – Use of External Aids –</li> </ul>	

<p>Awareness Training – Working with Families - Variables in Neurobehavioral Recovery: Demographic Variables – Injury related variables – psychological factors – Neuro-plasticity and Synaptic Reorganization – Factors in Training Program</p> <ul style="list-style-type: none"> <li>• Neuropsychology of learning disabilities, mental retardation and related developmental disabilities – Implications for Assessment and Remediation</li> </ul>

<b>88027 Early Identification of Hearing Impairment</b>	<b>Prevention and Screening of Hearing Impairment</b>
<b>Course:</b> Open Elective <b>Credits:</b> 04 <b>Contact Hours:</b> 3 hrs/week <b>Marks:</b> (25 + 25 + 50) 100	<b>Course:</b> Open Elective <b>Credits:</b> 04 <b>Contact Hours:</b> 4 hrs/week <b>Marks:</b> (25 + 25 + 50) 100
<b>Objectives:</b> After studying this <i>paper</i> , the student <i>teachers</i> are expected to <i>realize the following objectives</i> : 1. Importance of prevention and early identification of hearing impairment 2. Ways to prevent hearing impairment 3. Ways to identify hearing impairment at early stage 4. <i>Different test involved in hearing screening</i> 5. Importance of early rehabilitation and need for auditory training 6. Counseling and <i>need for</i> appropriate referrals	<b>Objectives:</b> After studying this <b>course</b> , the <b>students</b> are expected to <b>appreciate</b> the: 1. Importance of prevention and early identification of hearing impairment 2. Ways to prevent hearing impairment 3. Ways to screen hearing impairment at early stage 4. Need for early rehabilitation 5. Need for counselling and making appropriate referrals
<b>Unit 1: Role of hearing and causes</b> 1.1 Different terminologies and definition of hearing loss <b>1.2 Ear mechanism and physical attributes of sound</b> <b>1.3</b> Role of hearing, classification of hearing impairment and causes <b>1.4</b> Development of human <i>auditory system and</i> auditory behavior	<b>Unit 1: Hearing and hearing loss 18 Hrs</b> <b>1.1 Physical attributes of sound</b> <b>1.2 Overview of the ear, its function</b> <b>1.3</b> Role of hearing, <b>impact of hearing loss</b> , classification of hearing impairment <b>1.4</b> Causes of hearing loss <b>1.5 Signs and symptoms of hearing impairment</b> <b>1.6</b> Development of human auditory behavior

<p><b>Unit 2: Need for</b> prevention and early identification of hearing impairment</p> <p>2.1 <b>Important and need</b> for prevention of hearing impairment</p> <p>2.2 Different levels of prevention</p> <p>2.3 <b>Different measures involved in prevention of hearing impairment</b></p> <p>2.4 <b>Meaning and relevance of early identification</b></p> <p>2.5 Critical age concept and sensitivity period for language acquisition</p>	<p><b>Unit 2: Prevention and early identification of hearing impairment</b> <b>18 Hrs</b></p> <p>2.1 Need for prevention and early identification of hearing impairment</p> <p>2.2 Different levels of prevention – <b>primary, secondary and tertiary</b></p> <p>2.3 Critical age concept and sensitivity period for language acquisition</p> <p>2.4 Requirements of a good screening tool</p> <p>2.5 <b>Subjective test procedures and interpretation (Case history, check lists, behavioural observation)</b></p>
<p><b>Unit 3: Tests for early identification of hearing impairment</b></p> <p>Informal tests procedure (Case history, behavioral observation)</p> <p>3.1 <b>Formal tests procedure (HRR, behavioral observation, Screening OAE, Screening ABR)</b></p> <p>3.2 Individual and group screening / Mass media screening tests</p> <p>3.3 Diagnostic test procedure including Electrophysiological tests (Stimuli, procedures, recording of response)</p> <p>3.4 Interpretation of the test results, Validation and referrals</p>	<p><b>Unit 3: Screening for hearing impairment</b> <b>18 Hrs</b></p> <p>3.1 Objective screening tests procedure (OAE and ABR)</p> <p>3.2 Individual and group screening / <b>Role of mass media</b> in screening</p> <p>3.3 Interpretation of screening results and appropriate referrals</p> <p>3.4 <b>Sensitivity and specificity of different screening tools</b></p> <p>3.5 <b>Strategies to ensure follow-up of referred clients</b></p>
<p><b>Unit 4: Need early intervention of hearing impairment</b></p> <p>4.1 Counseling and referral for therapeutic management</p> <p>4.2 <b>Role of involvement of each team members</b></p> <p>4.3 <b>Scope and rational of auditory training</b></p> <p>4.4 <b>Different approaches and goals of auditory training</b></p>	<p><b>Unit 4: Early intervention of hearing impairment</b> <b>18 Hrs</b></p> <p>4.1 Need for early intervention</p> <p>4.2 Counselling and referral for therapeutic management</p> <p>4.3 Team members and their role</p> <p>4.4 <b>Overview to management techniques</b> (hearing devices, modes of communication and modes of education)</p>
<b>PRACTICUM</b>	
<i>Existing</i>	<i>Proposed</i>
	<ol style="list-style-type: none"> <li>1. Prepare a chart on development of auditory behaviour.</li> <li>2. Administration of hrr on caregivers or significant others of at least 2 children.</li> </ol>

	<ol style="list-style-type: none"> <li>3. Administer hearing screening tests and use of noise makers in at least 3 children.</li> <li>4. Observation of hearing evaluation and hearing aid trial of children and adults (1 each).</li> <li>5. Observation of auditory training (2 sessions).</li> <li>6. Maintenance of record of the above.</li> </ol>
